PROFILE SUMMARY

Passionate MERN Stack Developer with hands-on, production-level experience building and deploying live web applications using MongoDB, Express.js, React.js, and Node.js. Delivered a live e-commerce platform with a full admin dashboard, production-deployed on AWS, as a fresher, demonstrating the ability to write clean, efficient, and scalable code across frontend and backend. Strong understanding of JavaScript (ES6+), HTML5, CSS3, responsive design, and cross-platform compatibility. Experienced in developing and integrating RESTful APIs, managing MongoDB databases, and debugging and optimising application performance. Committed to staying updated with the latest full-stack development trends and collaborating with design and development teams to build user-friendly interfaces.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Redux Toolkit, Context API, React Hooks, Bootstrap, Tailwind CSS, Material UI, Vite, Responsive Design

Backend: Node.js, Express.js, RESTful API Development, MVC Architecture, JWT Authentication, OAuth 2.0, Middleware, Async Programming, Redis

Databases: MongoDB, Mongoose, MySQL, Aggregation Pipelines, Query Optimization

Cloud & DevOps: AWS (EC2, ECR), NGINX, PM2, Docker, GitHub Actions, Vercel, Cloudinary, SSL/HTTPS

Tools: Git, GitHub, Postman, Swagger/OpenAPI, Figma, VS Code, ESLint, Prettier

Concepts: State Management, API Integration, CRUD Operations, SDLC, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | Catalyst Tech Hub

Aug 2025 – Apr 2026

- Architected 25+ REST APIs with Node.js and Express.js, lifting backend response performance by 30%.
- Strengthened platform security with JWT authentication, RBAC, and email OTP verification, cutting unauthorized access by 40% across 8+ MongoDB schemas.
- Delivered end-to-end e-commerce functionality, including Stripe payment integration and full order lifecycle handling from placement through returns.
- Produced real-time sales analytics dashboards, cutting manual admin reporting effort by 50%.
- Deployed the production application on AWS EC2 with MongoDB Atlas and Nginx, sustaining 99%+ uptime at scale.

Junior Developer Intern | Expectation Walkers

Apr 2026 – Jun 2026

- Engineered Smile Smart Home, a MERN-based home automation platform with four role-based panels.
- Established the Super Admin module for account management, system health monitoring, and security policy enforcement.
- Configured the Admin panel for device setup, connected-user management, and report generation.
- Integrated AI-assisted scheduling and energy-usage insights into the User Dashboard.
- Designed 15+ backend endpoints, modeling schemas for users, devices, roles, and activity logs.
- Collaborated with the team through Git and Agile sprints to ship all four panels within a two-month window.

PROJECTS

E-Commerce Platform with Admin Dashboard | [Live Demo](#) | [GitHub](#)

- Developed and deployed a full-stack MERN e-commerce platform with 100+ product listings, user authentication, shopping cart, checkout, and an admin dashboard on AWS EC2 using PM2 and NGINX.
- Built and optimized 30+ RESTful APIs using Node.js and Express.js, supporting authentication, products, orders, cart, coupons, wallets, and payments.
- Created responsive user interfaces using HTML5, CSS3, and JavaScript, integrating frontend components with backend services.
- Designed 8+ MongoDB collections with Mongoose, leveraging aggregation pipelines, indexing, and query optimization to improve performance.
- Implemented JWT, email OTP verification, RBAC, and integrated Razorpay with a digital wallet for secure transactions.

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, JavaScript (ES6+), HTML5, CSS3, JWT, OAuth 2.0, Razorpay, AWS, NGINX, PM2

LEARNIX – AI-Powered Learning Management System (In Development) | [GitHub](#)

- Developing a full-stack AI-powered Learning Management System (LMS) with dedicated Student, Instructor, and Admin portals using React.js, Node.js, Express.js, MongoDB, and Redux Toolkit, following MVC architecture.
- Built 70+ RESTful APIs for authentication, course management, enrollments, payments, notifications, reviews, certificates, AI-powered learning, and interactive coding features with secure JWT, RBAC, Email OTP verification, and middleware-based authorization.

- Integrated Stripe Payment Gateway using Checkout Sessions, Payment Intents, and Webhook verification, alongside Cloudinary for media management, Redis for caching, and MongoDB aggregation pipelines with query optimization to improve application scalability and performance.
- Developed AI-powered features using Google Gemini API, including automated study notes, quiz generation, interview preparation, course progress tracking, certificates, live classes, notifications, reviews & ratings, and an in-browser coding playground powered by Monaco Editor.
- Designed responsive, modern user interfaces using React.js, Tailwind CSS, and Framer Motion, with planned deployment on Vercel (Frontend) and Render (Backend).

Tech Stack: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Mongoose, JavaScript (ES6+), Tailwind CSS, Stripe, Redis, Google Gemini API, Cloudinary, JWT, AWS, Vercel, Render, Git

CERTIFICATIONS

- Full Stack Web Development – MERN Stack, Catalyst Tech Hub — 2026
- Junior Developer Internship Certificate, Expectation Walkers — 2026

EDUCATION

University of Calicut

Bachelor of Computer Science | 2022 – 2025

Kerala
