Profile Summary

Passionate MERN Stack Developer with hands-on, production-level experience building and deploying live web applications using MongoDB, Express.js, React.js, and Node.js. Delivered a live e-commerce platform handling 200+ daily transactions and a full-stack classified marketplace — both production-deployed on AWS — as a fresher, demonstrating the ability to write clean, efficient, and scalable code across frontend and backend. Strong understanding of JavaScript (ES6+), HTML5, CSS3, responsive design, and cross-platform compatibility. Experienced in developing and integrating RESTful APIs, managing MongoDB databases, and debugging and optimising application performance. Committed to staying updated with the latest full-stack development trends, learning new tools and technologies, and collaborating with design and development teams to build user-friendly interfaces.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, jQuery

Frontend: React.js, Redux Toolkit, Context API, React Hooks, Bootstrap, Tailwind CSS, Material UI, Responsive Design, Cross-Platform Compatibility, Vite

Backend: Node.js, Express.js, REST API Development, RESTful API Integration, MVC Architecture, OAuth 2.0, JWT Authentication, Middleware, Async Programming, Redis

Databases: MongoDB, Mongoose, MySQL, Aggregation Pipelines, Query Optimisation, Database Management

DevOps: AWS (EC2, ECR), NGINX, PM2, SSL/HTTPS, CI/CD, GitHub Actions, Vercel, Cloudinary

Tools: Git, GitHub, Version Control, Postman, Figma, Swagger/OpenAPI, ESLint, Prettier, Agile/Scrum

Soft Skills: Problem Solving, Debugging, Team Collaboration, Communication, Willingness to Learn

Experience

Catalyst Tech Hub

Kerala, India

MERN Stack Developer Intern

May 2025 – Present

- Worked in a structured, full-time engineering environment designed to simulate real industry workflows, development practices, and professional expectations
- Part of an intensive developer training program focused on building production-ready applications using modern full-stack technologies and engineering practices
- Gained hands-on experience with React.js, Redux Toolkit, Node.js, Express.js, TypeScript, MongoDB, PostgreSQL, and REST API development
- Built and shipped full-stack features including reusable UI components, backend API endpoints, and database schemas while debugging issues and optimizing performance
- Worked in an Agile/Scrum development environment using Git/GitHub for version control, pull requests, and code reviews, collaborating with cross-functional frontend, backend, the full SDLC to deliver features, bug fixes, and enhancements
- Applied industry best practices including JWT authentication, role-based access control, database schema design, deployment workflows, and clean code architecture

Expectation Walkers

Remote

Junior Developer Intern

May 2026 – Jun 2026

- Developed and integrated 2 RESTful APIs with frontend components using Node.js and Express.js, enabling AI-powered content generation and recommendation features
- Collaborated with design and development teams to build user-friendly application interfaces following responsive design and cross-platform compatibility standards
- Debugged and resolved 5 critical production issues by tracing REST API integration errors and optimising async data-fetching flows
- Stayed updated with the latest full-stack development trends, proactively learning and adapting to new tools and technologies within the project cycle
- Participated in code reviews with Git version control workflows, demonstrating strong problem-solving and debugging skills throughout

Projects

E-Commerce Platform with Admin & Vendor Dashboard | Live Demo | GitHub

- Developed and deployed a live MERN stack web application handling real-time order and transaction processing — production-hosted on AWS with reliable, consistent uptime
- Built 30+ RESTful APIs using Node.js and Express.js and integrated them with React.js frontend components for authentication, inventory, and order management
- Wrote clean, efficient, and scalable code for both frontend (React.js, Bootstrap, Tailwind CSS) and backend (Node.js, Express.js, MongoDB) following best practices
- Managed and worked with MongoDB databases including complex aggregation pipelines, query optimisation, reducing load time by 75% (3.2s → 0.8s)
- Built user-friendly, responsive interfaces with cross-platform compatibility, prototyping key screens in Figma before development
- Tested, debugged, and optimised application performance using Redis caching, async handling, and indexing strategies
- Integrated Razorpay payment gateway API; achieved 99.8% transaction success rate across COD and online payment flows
- *Tech Stack: React.js, Node.js, Express.js, MongoDB, JavaScript (ES6+), JWT, OAuth 2.0, Bootstrap, Tailwind CSS, Razorpay, AWS, NGINX*

OLX-Style Classified Marketplace Platform | GitHub

- Built a scalable, responsive full-stack web application supporting 500+ dynamic listings with advanced filtering and database-driven architecture
- Optimised MongoDB queries using skip/limit pagination, reducing page load by 65% and supporting 10,000+ inventory items
- Developed reusable React.js components for listing and vendor-side product management with pricing controls and status tracking
- Integrated Cloudinary REST API for image upload, automatic optimisation, and CDN delivery; reduced storage costs by 80%
- *Tech Stack: React.js, Node.js, Express.js, MongoDB, JavaScript (ES6+), JWT, Tailwind CSS, Cloudinary*

AI-Powered Career Guidance Platform | GitHub | In Development

- Architected the complete backend layer with Node.js, Express.js, MongoDB, and JWT authentication supporting 10+ RESTful API endpoints
- Integrated third-party AI APIs to power career guidance features, applying RESTful API integration and async programming patterns
- Implemented role-based access control, secure auth flows, and real-time data sync between client and backend services
- *Tech Stack: Node.js, Express.js, MongoDB, JWT, React Native, REST API Integration*

Education

University of Calicut
Bachelor of Computer Science

Kerala
2022 – 2025
